Forwarding your business calls: Canadian provider guide 8-9

In a hurry? Read page 3 (the four steps) and page 8 (forwarding your calls). Everything else is reference. You can read this guide online any time at **hellora.ca/help**.

What Hellora does for you

- **Answers every call** in a natural voice, any time of day, including nights, weekends and holidays.
- **Books appointments** straight into your calendar.
- **Takes messages** and sends you a clear summary of each call.
- **Passes urgent calls to a person** when you want it to.
- **Follows up** on enquiries and sends reminders.

Getting started in 4 steps

1 **Tell us about your business: the online form (about 5 minutes)**
After you pay, we email you from **hello@hellora.ca**. Tap **Tell us about your business** in that email. It opens a private form on hellora.ca, linked to your payment. It asks for: business name and your name, business phone, website, type of business and address, opening hours, services, booking rules (length, notice, cancellations), who to pass urgent calls to and when, your calendar (Google, Outlook or none), the email for your call reports, your phone provider, your most common questions and answers, and anything else we should know. Tick the confirmation box and tap Send. We email you a confirmation straight away. Lost the email? Write to hello@hellora.ca. Something changes later? Reply to any Hellora email.

2 **We build your receptionist and email you a test number**
We set it up from your answers. When it is ready, we email you from **hello@hellora.ca** with your test phone number. Your test number and every later email come only from that address (see page 4).

3 **Call it and tell us what to change**
Phone the test number several times: ask about prices and hours, book a visit, ask for a person, call as a rushed or confused caller. Reply to our email with anything you would like changed.

4 **Go live**
When you are happy, forward your business calls to your Hellora number. We help you with this step. Provider by provider instructions are on page 8.

Tip: the more detail you give in the form (usual questions and answers, prices you are happy to share, who takes urgent calls), the better your receptionist sounds.

Emails from Hellora: how to know they are genuine

Every email we send you comes from one address:

hello@hellora.ca

Depending on the message, you may see the name **Hellora** or **Hellora Calls** next to that address. It covers your welcome email, the business form link, your test number, call summaries, appointment confirmations and reports. If you reply, your reply reaches us.

Quick checks

- The address ends in **@hellora.ca**, with no extra words, numbers or letters.
- Links go to **hellora.ca**, **app.hellora.ca** or Stripe's billing page (**billing.stripe.com**).
- Our emails carry the Hellora logo, the orange line and the signature "Hellora | AI Phone Receptionist".

We will never ask for a password, a card number or a bank transfer by email. Payments are only ever made through the secure Stripe page. If an email looks odd, do not click it: forward it to hello@hellora.ca and we will check.

If you heard from us before you signed up

Before you became a customer you may have received a message from Paresh at **paresh@gethellora.ca**. Once you are a customer, everything comes from hello@hellora.ca.

Where else you can check

Your dashboard at **app.hellora.ca** always shows the real status of your calls. If an email claims something that the dashboard does not show, write to hello@hellora.ca.

Your dashboard

Sign in at **app.hellora.ca** with the email you used when you paid. We send a one-time sign-in link to that address (from hello@hellora.ca), so there is no password to remember. The link lasts for a short time. If it expires, request a new one.

- See every call, with a summary and the full transcript.
- See who booked and when.
- Spot calls that need a person to follow up.

Call summaries by email

After every call, a summary is emailed to the report address you gave in the form. It shows who called, how long they spoke, what they wanted and how the call ended. This is switched on for every customer and is all you need.

Other alerts

You can also get instant alerts on your phone through Telegram. It is optional. The next page explains it step by step.

> If a caller asked for a person and nobody could be reached, the summary email is marked **NEEDS A HUMAN**, so call them back.

Optional: instant alerts on Telegram

Telegram is a free messaging app. Hellora can send you a short message each time a call finishes or an appointment is booked. **You do not need it.** Email already tells you everything. Skip this page if it feels like too much.

Part A: install Telegram (skip if you already have it)

1. On your phone, open the **App Store** (iPhone) or **Google Play** (Android).
2. Search for **Telegram Messenger** and tap **Get** or **Install**. Open it.
3. Tap **Start Messaging**, enter your mobile number and tap the arrow.
4. Telegram sends you a login code (by text or inside the app). Type it in, then enter your name.

Part B: connect Hellora

1. On the **same phone**, open the Hellora welcome email (from hello@hellora.ca).
2. Tap the orange **Connect Telegram** button.
3. If your phone asks which app to use, choose **Telegram**. If a web page opens first, tap **Open in Telegram** or **Send message**.
4. A chat called **Hellora Alerts** opens. Tap the **START** button at the bottom of the screen.
5. Within a few seconds you receive a message saying Telegram is connected. That is all.

Part C: what you will receive

- A short note when a call finishes, with who called and what they wanted.
- An alert when an appointment is booked.
- An urgent alert when a caller needs a person.

Using Telegram on a computer

Install **Telegram Desktop** from telegram.org, or open web.telegram.org, and log in with the same mobile number. The Hellora Alerts chat appears there too.

Not working?

- **Button opened a web page and nothing happened:** tap **Open in Telegram**. If you do not have Telegram yet, install it first, then tap the button in the email again.
- **No confirmation message:** check the Hellora Alerts chat shows you pressed START, then write to hello@hellora.ca and we will connect it for you.
- **No sound or popups:** open your phone's Settings, then Notifications, then Telegram, and turn notifications on.

Turning it off

Open the Hellora Alerts chat, tap the name at the top and choose **Mute** or **Delete chat**. Your emails are not affected.

Passing a call to a person

You choose when Hellora hands a call over (for example urgent problems, or a caller who asks for a person) and which number it should ring. If nobody answers, Hellora takes a message and marks the call as needing a follow up.

Changing your information

Hours changed? New service? A question callers keep asking? Reply to any Hellora email, or write to **hello@hellora.ca**, and tell us what to update.

Calls and your callers

Callers should know they are speaking with an AI assistant, and rules on recording calls vary by province. We help you set up the greeting and notices that fit your business. You remain responsible for the notices your callers need to hear (see our Terms at hellora.ca/terms).

Billing

You receive a receipt from Stripe for every payment. To update your card, see invoices or cancel, use the billing portal link in your plan email. You can cancel any time (hellora.ca/refunds).

Need help?

Email	hello@hellora.ca (or reply to any email from us)
Online guide	hellora.ca/help
Dashboard	app.hellora.ca

When you write, include your business name and, if it is about a call, the caller's number and roughly when it happened. It helps us fix things faster.

Thank you for trusting Hellora with your phones.
The Hellora Team

Forwarding your calls: provider guide

In every code below, **H** is your 10-digit Hellora number (for example 4165550123), without a leading 1. We recommend **forward when unanswered or busy**: your phone rings first, and Hellora answers when nobody picks up. Dial the code from the phone line you are forwarding, then press call. You should hear a confirmation tone or message.

Mobile lines

Provider	No answer	Busy	Switch off
Rogers, Fido	`*61*H#`	`*67*H#`	`##61#` `##67#`
TELUS, Koodo	`*61*H#`	`*67*H#`	`#61#` `#67#`
Freedom Mobile	`*61*H#`	`*67*H#`	`#61#` `#67#`
Fizz	`**61*H#`	`**67*H#`	`#61#` `#67#`
Bell, Virgin Plus	No code: Phone settings, Call Forwarding, choose when unanswered or busy		Deactivate All
Vidéotron mobile	No code: Phone settings, Call Forwarding (forwards every call)		Turn off in settings

Forward all calls: `*21*H#` (Rogers, Fido, TELUS, Koodo, Freedom), `**21*H#` (Fizz). Off: `##21#` (Rogers, Fido) or `#21#`. On Rogers and Fido, forwarding unanswered or busy calls works only when the line's own voicemail is switched off. Koodo may charge a small monthly fee for forwarding. Check the status of a forward with `*#61#` or `*#67#`.

Home and business landlines

Provider	All calls	No answer	Busy
Bell	`*72H` (off `*73`)	`*92H` (off `*93`)	`*90H` (off `*91`)
Rogers home phone	`*72H` (off `*73`)	`*92H` (off `*93`)	`*90H` (off `*91`)
Vidéotron	`*72H` (off `*73`)	`*92H` (off `*93`)	`*90H` (off `*91`)
Cogeco	`*72H` (off `*73`)	Ask Cogeco to enable	

No answer and busy forwarding on landlines may need voicemail switched off, and some business lines need the feature added to the account. If a code does nothing, call your provider and ask for "conditional call forwarding to another number".

VoIP and business phone systems (RingCentral, 8×8, Ooma, Google Voice, Microsoft Teams, a PBX): set forwarding inside the system's admin page, under call handling or forwarding rules, with **forward if no answer after 3 to 4 rings** to your Hellora number. Tell us which system you use and we will send the exact steps.

Providers by province

Common providers in each province and territory (not a complete list). Find yours, then use the matching line on the previous page.

Province	Common providers
British Columbia	TELUS, Rogers, Freedom Mobile, Shaw, Bell, Koodo, Fido
Alberta	TELUS, Rogers, Freedom Mobile, Shaw, Bell, Koodo, Fido
Saskatchewan	SaskTel, TELUS, Rogers, Bell
Manitoba	Bell MTS, TELUS, Rogers, Shaw, Bell
Ontario	Rogers, Bell, TELUS, Freedom Mobile, Cogeco, Eastlink, Fido, Koodo, Virgin Plus
Quebec	Bell, Vidéotron, TELUS, Rogers, Fizz, Cogeco, Virgin Plus
New Brunswick	Bell Aliant, Rogers, Eastlink, TELUS
Nova Scotia	Bell Aliant, Eastlink, Rogers, TELUS
Prince Edward Island	Bell Aliant, Eastlink, Rogers
Newfoundland and Labrador	Bell Aliant, Rogers, Eastlink
Yukon, Northwest Territories, Nunavut	Northwestel, Bell Mobility

Providers without a code in this guide

SaskTel, Eastlink, Bell MTS, Bell Aliant, Shaw, Northwestel and smaller providers: open your phone's **Call Forwarding** settings, or try the mobile codes above, and if nothing works call the provider and ask for **conditional call forwarding** to your Hellora number. Tell us who your provider is and we will send you the steps.

After you set it up

1. From another phone, call your normal business number and let it ring. You should hear Hellora answer.
2. Check that you receive the call summary email.
3. To stop forwarding at any time, use the switch-off code for your provider.

> Provider codes can change, and plans differ. These come from published provider guides. If a code does not work for you, we will walk you through it.
